## OBJECTIVE

Frontend Developer specializing in React, React Native, JavaScript, and TypeScript, with approximately 1 year of hands-on experience through internship and real-world projects. Skilled in building scalable web applications, real-time systems, and AI-integrated features, with a strong ability to deliver high-performance, production-ready solutions.
Passionate about frontend architecture, real-time data visualization, and building seamless, interactive user experiences.

## EDUCATION

**FPT University** Jan 2023 - Dec 2025

Bachelor of Information Technology, Major: Software Engineering

• GPA: 3.17/4.0

## COMPETENCIES

| | |
|---|---|
| • **Technical skills:** | - Languages: TypeScript, JavaScript (ES6+)<br>- Frontend: React, Next.js, React Native, Expo, HTML5, CSS3, MUI, TailwindCSS<br>- Backend: NestJS, Node,js<br>- Databases: MySQL, MongoDB<br>- Tools & Platforms: Git, GitHub, Azure, Figma, Notion, Jira |
| • **Hard skills** | Vietnamese: Native, English: Upper-Intermediate (B2 – CEFR), Japanese (Basic). |
| • **Soft skills:** | Work in groups, responsibility, social network, leadership, problem-solving, critical thinking. |

## WORK EXPERIENCE

**Amazing Tech** Aug 2024 - Dec 2024

**Frontend Developer (Internship)**

- Developed real-time monitoring dashboard for IoT-based chicken farm management system.
- Implemented RTSP/RTMP live camera streaming interfaces.
- Built reusable UI components with Material UI and Ant Design.
- Integrated real-time sensor data using Socket.IO.

## PROJECTS

**Apartment Storage Management System (ASMS)** Sep 2025 - Dec 2025

**Lead Frontend Developer**

Build a **3D-simulated platform for apartment storage rental and management**
**Team size:** 4 members
**Position:** Lead Frontend Developer
**Responsibilities:**

- Led frontend development and designed the overall **UI/UX architecture**.
- Developed responsive and modular **React + TypeScript UI components**.
- Integrated **REST APIs and cloud services** into the frontend system.
- Implemented **3D storage visualization and booking workflow interfaces**.

**Technology in use:** React, React Native, TypeScript, C#, .NET, Azure, SQL Server, Cloudinary, PayOS, Google Maps API, MailKit, Vercel

**Website:** https://www.asms.website

**Nekolingo Language Learning Platform** Jun 2025 - Aug 2025

**Lead Backend Developer**

Build a **learning platform integrating AI and gamification features**
**Team size:** 5 members
**Position:** Lead Backend Developer
**Responsibilities:**

- Designed **backend architecture and database schema** using NestJS and MongoDB.
- Implemented core **business logic for lesson progression, gamification, and user tracking**.
- Integrated **AI APIs for generating personalized learning content**.
- Built **payment system integration** and optimized backend performance.

**Technology in use:** NestJS, MongoDB, Docker, TypeScript, Cloudinary, Cloudflare, VNPay, Gemini API, React, React Native

**Website:** https://nekolingo-web.vercel.app/

**SmartBus Intelligent Transportation Platform** Mar 2025 - May 2025

**Lead Frontend Developer**

Build a **real-time public transportation tracking and route planning system**
**Team size:** 3 members
**Position:** Lead Frontend Developer
**Responsibilities:**

- Designed and developed the **entire frontend interface** for web and mobile.
- Integrated **Google Maps API for route visualization and navigation**.
- Implemented **real-time bus tracking and route planning UI**.
- Developed digital ticket purchase interface integrated with **PayOS payment gateway**.
- Optimized user experience for **transportation search and route discovery**.

**Technology in use:** React, React Native, JavaScript, C#, .NET, Azure, Cloudinary, Vercel, PayOS, Google Maps API, Expo
