OBJECTIVE

Fullstack Developer specializing in React, React Native, Node.js, NestJs, JavaScript, and TypeScript, with approximately 1 year of hands-on experience through internship and real-world projects. Skilled in building scalable web applications, real-time systems, and AI-integrated features, with a strong ability to deliver high-performance, production-ready solutions.
Passionate about frontend architecture, real-time data visualization, and building seamless, interactive user experiences.

EDUCATION

FPT University Jan 2023 - Dec 2025

Bachelor of Information Technology, Major: Software Engineering

• GPA: 3.17/4.0

COMPETENCIES

• **Technical skills:**	- Languages: TypeScript, JavaScript (ES6+) - Frontend: React, Next.js, React Native, Expo, HTML5, CSS3, MUI, TailwindCSS - Backend: NestJS, Node,js - Databases: MySQL, MongoDB - Tools & Platforms: Git, GitHub, Azure, Figma, Notion, Jira
• **Hard skills**	Vietnamese: Native, English: Upper-Intermediate (B2 – CEFR), Japanese (Basic).
• **Soft skills:**	Work in groups, responsibility, social network, leadership, problem-solving, critical thinking.

WORK EXPERIENCE

Amazing Tech Aug 2024 - Dec 2024

Frontend Developer (Internship)

- Developed real-time monitoring dashboard for IoT-based chicken farm management system.
- Implemented RTSP/RTMP live camera streaming interfaces.
- Built reusable UI components with Material UI and Ant Design.
- Integrated real-time sensor data using Socket.IO.

PROJECTS

Apartment Storage Management System (ASMS) Sep 2025 - Dec 2025

Lead Frontend Developer

Build a **3D-simulated platform for apartment storage rental and management**
Team size: 4 members
Position: Lead Frontend Developer
Responsibilities:

- Led frontend development and designed the overall **UI/UX architecture**.
- Developed responsive and modular **React + TypeScript UI components**.
- Integrated **REST APIs and cloud services** into the frontend system.
- Implemented **3D storage visualization and booking workflow interfaces**.

Technology in use: React, React Native, TypeScript, C#, .NET, Azure, SQL Server, Cloudinary, PayOS, Google Maps API, MailKit, Vercel

Website: https://www.asms.website

Nekolingo Language Learning Platform Jun 2025 - Aug 2025

Lead Backend Developer

Build a **learning platform integrating AI and gamification features**
Team size: 5 members
Position: Lead Backend Developer
Responsibilities:

- Designed **backend architecture and database schema** using NestJS and MongoDB.
- Implemented core **business logic for lesson progression, gamification, and user tracking**.
- Integrated **AI APIs for generating personalized learning content**.
- Built **payment system integration** and optimized backend performance.

Technology in use: NestJS, MongoDB, Docker, TypeScript, Cloudinary, Cloudflare, VNPay, Gemini API, React, React Native

Website: https://nekolingo-web.vercel.app/

SmartBus Intelligent Transportation Platform Mar 2025 - May 2025

Lead Frontend Developer

Build a **real-time public transportation tracking and route planning system**
Team size: 3 members
Position: Lead Frontend Developer
Responsibilities:

- Designed and developed the **entire frontend interface** for web and mobile.
- Integrated **Google Maps API for route visualization and navigation**.
- Implemented **real-time bus tracking and route planning UI**.
- Developed digital ticket purchase interface integrated with **PayOS payment gateway**.
- Optimized user experience for **transportation search and route discovery**.

Technology in use: React, React Native, JavaScript, C#, .NET, Azure, Cloudinary, Vercel, PayOS, Google Maps API, Expo
